We'll probably have to revise the text and possibly add another file, too. Will keep you posted.

Yes, I can make it live. I need to send a message to WebCMS to have the password protection removed. Just tell me when.

This is the website in question ... we're going to need to make it live something later today. Will you be able to do that?

Thank you, Pat. Jennifer Ostermeier is back and is taking over working on this project, so I'm passing this along to her.

Karen – we found some PII in the zip file that Dean provided and created a redacted version to replace what is presumably on the site. I haven't been able to access the site using the username and password provided to confirm. Please replace the zip file that Dean provided with the zip attached to this message. Please let me know when the site is ready for review.

The page now requires a password to view it:

Ex. 5 Deliberative Process (DP)

When you are ready for people outside EPA to review it, let me know and I'll publish it. The address to give them will be: <https://www.epa.gov/wi/juneau-county-groundwater-screening-investigation>

Subject: Juneau County Groundwater Investigation Website with redacted data

Here's the data we have responsive to the Juneau County FOIA. The CRL and the field data did not contain any homeowner's well sampling data only the UNL data, which I converted to pdf file and redacted the information that contained homeowner well sampling data.

There are now 22 (Dean's zip file had 21 files) files because the UNL data had one excel document with two tabs one for the nitrate data and one for the N15 Isotope data, I converted both to pdf and redacted the information.

If you have any questions, please don't hesitate to ask.

Sincerely,

Cheryl Burdett
